

# Your **Bio**connection

A Letter of News and New Products for Medical Professionals  Volume 8 / No. 2

## Expanded Cable Assembly Capabilities Now Available

### Through Newly Acquired "Cables Unlimited" Division

RF Industries now offers custom cable assemblies through newly acquired **Cables Unlimited**. Cables Unlimited is part of the Corning Connections Gold Program, which designates high quality and an exclusive 25 year warranty.

**Cables Unlimited**

**Fiber to the Antenna**

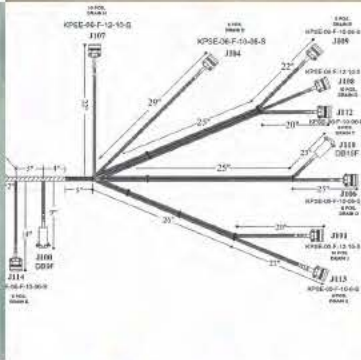

**Fiber Optic & MTP® Fiber Cables**

**Ethernet & "Rack and Stack" Servers**

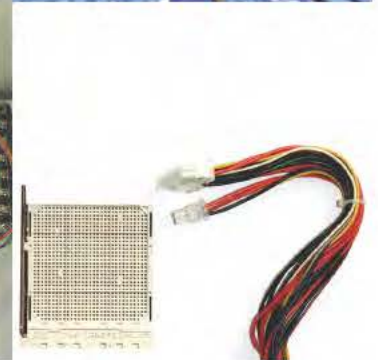

**Wire Harnesses**

**Build to Spec**

**Enclosures**

**Power Cables**

Contact Bioconnect for more information.

## About Cables Unlimited

Cables Unlimited is a high quality interconnect cable and wire harness manufacturer serving OEM customers. They manufacture custom cable assemblies, adapters and electromechanical wiring harnesses for computer, LAN, communications, automotive and medical equipment. With over 25 years of experience as a custom fiber cable manufacturer, we have the knowledge and expertise to fill your customer requirements.

### Division of RF Industries

In June of 2011 RF Industries acquired Cables Unlimited in order to provide more complete solutions to the telecommunications industry.

### Corning CAH Connections<sup>SM</sup> Gold Program

Cables Unlimited is one of an elite group of cable assembly houses (CAHs) that meet the high production and quality standards required for this program. These companies have demonstrated, over a period of many years, a proven track record of manufacturing and business excellence.

### Extended Warranty Program

As a Corning Gold Program member, Cables Unlimited Corning fiber patch cables are covered by the Corning Extended Warranty Program<sup>SM</sup> that provides a 25 year project warranty.

### Fiber Optics in the Medical Field

Fiber optics have been used in the medical industry for years. The physical characteristics of fiber make it a natural choice for any different applications. It is commonly used for illumination, flexible image bundles, light conductors, flexible light guides, laser delivery systems and equipment interconnects. Fiber optics provide a very compact, flexible conduit for light or data delivery equipment, surgical, and instrumentation applications.

Traditional medical fiber optic applications include light therapy, x-ray imaging, ophthalmic lasers, lab and clinical diagnostics, dental hand pieces, surgical and diagnostic instrumentation, endoscopy, surgical microscopy, and a wide range of equipment and instrument illuminations.

# Custom Cable Assemblies Through Bioconnect

## Audio / Video

Cables Unlimited offers high quality along with competitive prices for audio, audio-video and video cable assemblies, for both analog and digital connections.

## RF / Coax

RF Industries manufactures standard and custom cable assemblies for medical, computer, LAN, RF, monitoring and communications equipment. Complete product design, tooling design and fabrication, materials processing and selection, product manufacture, assembly, testing and packaging are available.

Made in USA

# Custom Cable Assemblies Through Bioconnect

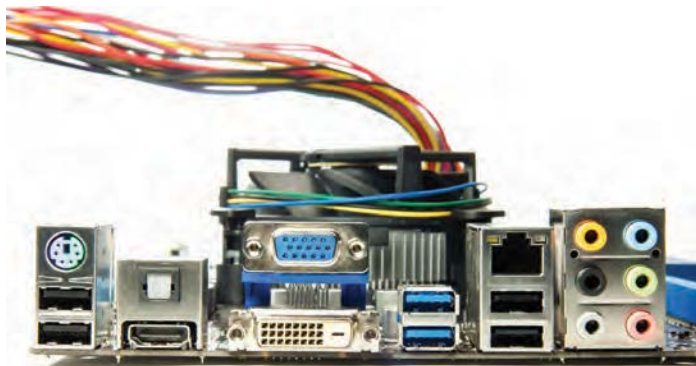

## Fiber Optic, High Density MTP

Cables Unlimited offers Corning fiber assemblies using Multi-fiber Termination Push-on (referred to as MTP) connectors designed by USConec. This compact design allows high-density connections between network equipment. Where space is an issue, the MTP allows for more connectors on the overcrowded faceplate, thus reducing the footprint of the systems. It will interface with current MPO connectors. It is the same size as an SC connector, but since it can hold up to 12 fibers, it provides up to 12 times the density.

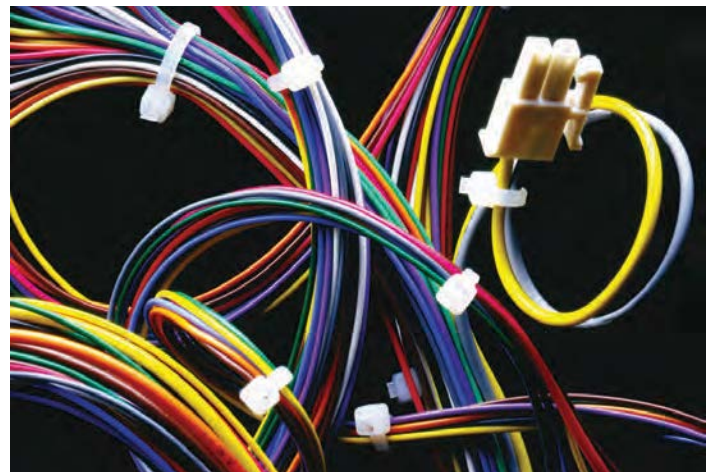

## Data with Rack and Stack

Ever wonder how much time and money could be saved if your new data center equipment arrived fully cabled, racked, with hardware installed? Cables Unlimited offers rack and stack services that can eliminate labor-intensive tasks that must be performed when you install new server clusters, storage devices or networking equipment. Once completed, we will ship the server rack directly to your site for immediate and simple installation.

## Power

Cables Unlimited manufactures/markets a wide spectrum of power cords and power harnesses for computers, peripherals, data communications, networking equipment and power supplies.

## Wiring Harness

From simple point-to-point to complex multiple-branch and fiber optic harnesses, we provide custom wiring harness design and manufacturing.

## AAMI Twin Pin Cable Assemblies Now Offered in 3-Lead and 5-Lead Sets

Drop by our booth at  
MD&M, Minneapolis,  
November 2-3,  
and examine our quality for yourself.

*Bioconnect uses Santoprene® as a primary molding material  
and outer insulation material in all of their standard ECG  
products, including twin-pin leads.*
